

UPBICYCLE BIKE RESTORATION

Restoring and repurposing bikes to build skills, confidence, and opportunity—one bike at a time.

bike restoration

PROGRAM THEMES & GOALS

UPbicycle: A Bike Restoration & Community Workshop Program

UPbicycle is a practical, bike restoration program where participants learn real mechanical and workshop skills in a supportive, hands on environment.

Participants will dismantle and rebuild donated bicycles, learn safe tool use, replace and recycle parts, and collaborate to restore bikes and participate in community facing activities such as collecting donations, welcoming community members, and preparing refurbished bikes for affordable sale or donation.

Every restored bike supports sustainability, reduces waste, and strengthens connections with the local community.

Through daily participation, individuals build:

- Mechanical skills: disassembling, reassembling, repairing bikes
- Tool use confidence: safe handling of workshop tools and equipment
- Fine motor and hand eye coordination
- Problem solving and practical thinking
- Teamwork and communication skills
- Pride and independence through real outcomes and meaningful contribution

The UPbicycle program empowers participants to grow their skills and confidence while making a positive impact - restoring bikes, reducing landfill, supporting the community, and building new opportunities every day of the week.

Daily Program Fee: \$8.00

Programs are subject to a program fee. All reasonable efforts have been made to ensure fees remain minimal.
